

Woolmer Hill School Five Year Progression Pathway

The Progression Pathway is made up of five steps with every pupil given an aspirational target and path to success based on their start point on entry to the school.

Each step is incrementally more challenging, designed to support progress as pupils develop skills and embed deeper understanding of key concept and core knowledge towards their GCSE's.

To master any progression step takes time and effort. Mastering three progression steps over five years would be recognised as good progress.
